Ideation Phase Brainstorm & Idea Prioritization

Quotes Recommendation Chatbot using Rasa NLU

Date	07 March 2026
Team ID	SmartBridge-EL-2026
Project Name	Quotes Recommendation Chatbot using Rasa NLU
Maximum Marks	As per evaluation criteria

SmartBridge Experiential Learning Program
Team Members: Vansh Malhotra | Varun Gaikwad | Vedika Tandulwadkar | Vidisha Jain

Step 1: Problem Statement Selected

How might we build a simple, conversational tool that instantly delivers the right type of motivational, inspirational, love, success, or funny quote based on a user's natural language request?

Step 2: Idea Brainstorming — All Ideas Generated

Idea	Description
Rasa NLU Chatbot (SELECTED)	Build a chatbot using Rasa NLU that classifies intent from natural language input and responds with the relevant quote category
REST API Quote Service	Create a Python/Flask REST API that accepts a category query parameter and returns a random quote from a JSON database
Mobile App (Android)	Build a native Android app with a chat-like UI for quote recommendations
Telegram/WhatsApp Bot	Integrate a bot into Telegram or WhatsApp using their respective Bot APIs
Browser Extension	A Chrome extension that recommends a quote of the day based on browsing mood
GPT-Powered Quote Generator	Use OpenAI GPT API to generate unique quotes on demand based on mood input
Daily Email Newsletter	A subscription service that emails personalised quotes daily based on user preference
Social Media Sharing Bot	Automate posting quotes to Instagram/Twitter based on category and schedule

Step 3: Idea Grouping

Category	Ideas in Group	Group Label
Conversational AI	Rasa Chatbot, GPT-Powered Generator, Telegram Bot	Chat-Based Solutions
Web/API	REST API Quote Service, Browser Extension	Web-Based Solutions
Mobile	Android App	Mobile Solutions
Social/Async	Daily Email Newsletter, Social Media Bot	Async Delivery Solutions

Step 4: Idea Prioritization (Importance vs Feasibility)

Idea	Importance (H/M/L)	Feasibility (H/M/L)	Decision
Rasa NLU Chatbot	High	High	✅SELECTED
REST API Service	Medium	High	Partial (used as backend layer)
Telegram Bot	High	Medium	Future Enhancement
GPT-Powered Generator	High	Low (cost/API limits)	Future Enhancement
Android App	Medium	Low (time constraint)	Out of scope
Browser Extension	Low	Medium	Out of scope

Final Selected Idea

Rasa NLU-based Quotes Recommendation Chatbot with a Flask web interface — selected because it is high in both importance and feasibility, uses open-source technology (no API costs), can be built and tested locally, and directly addresses the core problem statement.
